Gii 4 Alpha

Cena	1 950 zł
Dostępność	Dostępny
Czas wysyłki	48 godzin
Producent	Sky Paragliders

Opis produktu

- **Uprząż używana**
- **Nalot około 50 godzin**
- **stan techniczny dobry +**
- **Jak się nie spodoba, to można odesłać.**

- **w zestawie karabinki**
- **belka speeda**

Rozmiary M, L, XL

Gii 4 Alpha is a new generation of harnesses for paragliding schools, as well as for pilots who love things simple and practical. Perfection is reached only when you think of everything. And this is how Gii 3 was reborn as the new Gii 4 brand.

The main distinctive features are:

- Our strap system features the popular "4S" system (SKY SAFETY STRAP SYSTEM) to ensure safety and comfort provided by the "one loop only" system.
- The strap system has been redesigned to include 30 mm straps to easily fit our new main carabiners.
- The current strap was custom designed and manufactured for our harness - we did not want to compromise and when there is nothing to choose from on the market, we have to design it ourselves. The strap is robust, suitable for heavy stitching using either bar tack or automated stitching, features well-balanced elasticity and works well with the buckles we use.
- The back part has been modified to feature a new shape. We listened carefully and know how some pilots need more space in the main pocket
- The shoulder straps have been made longer to improve ground handling and add comfort for ground training and early days of take-offs and landings at the training field
- The new harness is designed with separate leg straps for added comfort. Male pilots will especially appreciate this new feature, but the easy-to-get-into harness will certainly be favoured by female pilots, as well.

- Gii 4 Alpha features an LTF certified back protector.
- Leg straps were designed for easier integration of the harness board.
- Gii 4 Alpha features an integrated radio pocket and is also camelback ready.
- Side pockets are fitted with safety loops.
- Specially designed covers for the speed system eliminate the risk of messing up with the reserve handle.
- Adjustable container and reserve handle can be switched to the other side for left-handed pilots.
- The geometry of the harness has not been changed. The harness itself remains comfortable, practical, easy to adjust, very stable and still provides flight information from the wing.

Harnesses are delivered with:

- V risers for a reserve
- handy reserve fitting & maintenance kit
- Sky USB flash drive manual

Please check the [Accessories section](#) for more information about the harness - reserve connection & scope of delivery.

Please note: Speed bar is not included in the scope of delivery. Photos show it for reference purposes only

Gii 4 Alpha is available in 3 primary colours and wide range of sizes to fit most pilots. Please, check sizes carefully with your dealer to allow for maximum comfort during flight.

Produkt posiada dodatkowe opcje:

Kolor.: Grey , Navy

Rozmiar : L , M , XL
