SAVEMAX CD36 (125kg)

Cena	2 520 zł
Dostępność	Oczekujemy na dostawę
Czas wysyłki	3 dni
Producent	Sol Paragliders

Opis produktu

The SAVEMAX emergence system is a parachute specially constructed for paraglide use. Its conception results in an opening time fast and reduces the involuntary openings.

SAVEMAX has the most modern in the emergence parachute technology development to paragliders. There are 7 models to all needs.

They are made in high tenacity Nylon 6.6 which is specific to parachutes. All SAVEMAX models have a Pulled down system(APEX). The low pore size of the fabric (0-3 cfm) follows the F-111 Standard.

The lines are Nylon with great elasticity to minimize the opening impact. The points of connection of the lines are sewn with Nylon ribbons of high tenacity. The riser presents a resistance of 1.800kg.

In the CD model, beyond the Pulled Down APEX, the parachutes have a double canopy system that guarantees a bigger flight stability and less time of inflation.

The Double canopy system and pulled down APEX is the most modern in the reserve technology. It provides a faster opening and a lower sink rate when compared to traditional reserves.

Dane Techniczne

Modelo	Model	36 CD	40 CD	
Tamanho	Size	36	40	m2
Painéis	Number of Cells	16	18	
Taxa de Queda	Sink Rate	4,22	3,98	m/s
Peso Mínimo	Minimum Weight	75	90	kg
Peso Máximo	Maximum Weight	125	145	kg
Peso do Reserva	Weight Rescue	2,4	2,6	kg
Certificação	Certification	PS2036SL	PS2037SL
