Opis produktu

Wasabi 3 Acro Harness

As a result of the vast experience from achieved titles in aerobatic worlds events in close cooperation with the best pilots we are launching the new Acro harness Wasabi 3.

This harness was developed to satisfy the demand of aerobatic and freestyle pilots.

It aims at pilots also who search for their limits and who want to practice with two independent rescue systems.

Enabled to install two rescues in strategically important position guaranteeing highest safety. Option for Rogallo rescue installation in lower rescue compartment.

The upper rescue compartment is completely new and redesigned and inspired by the base jump rescue containers, providing a bigger volume space and release accuracy.

Safety Technology

- Back Pocket
- Container for lower rescue and handle
- Back composed by ergonomic foam back protector and PP plate with breathable surface
- Adjustable Flat Quick Lock 28mm adjustable for 38-55 cm
- ABS system with more stability in turbulent flights and collapses
- Quick lock buckles with neoprene protectors

- Shoulder adjustment
- Release system of foot stirrup
- Speed system
(not included in the harness)
- Container for upper rescue
- Foot stirrup with fixing system
- Side adjustment for the backrest
- PP plate for better load distribution
- Anatomic shoulder cuts
- RS handle for upper rescue system
- Foot stirrup.

*** Photos of carabiners, ballast containers and hydration pack are illustrative and not included in the harness.**
